Amendment, filed 09/28/04 has been entered. Claims 1-6 and 8-11 are allowed.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Abdollah Katbab on 12/21/04. The application has been amended as follows:

Claims 7 and 12 have been cancelled and claim 8 has been amended per Attachment A.

Note. Claims 7 and 12 were cancelled and claim 8 has been amended, because claim 7 per amendment of 09/28/04 would require a new search.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dmitry Levitan whose telephone number is (571) 272-3093. The examiner can normally be reached on 8:30 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on (571) 272-3088. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Attachment A.

7. (Cancelled)

8. (Previously Presented) A method for facilitating a transparent service option transition between a first communication device and a second communication device, comprising:

establishing a first communication with said second communication device using a first service option;

transmitting a request to transition said first communication to a second communication using a second service option; and

transitioning said first communication to said second communication;

retrieving an identification code corresponding to said second communication device from a storage device located within said first communication device;

terminating said first communication; and

initiating said second communication using said identification code to identify said second communication device.

9. (Previously Presented) The method of claim 8 wherein said initiating said second communication comprises establishing said second communication within a predetermined period from the time said first communication was terminated.

10. (Previously Presented) The method of claim 8 wherein said retrieving said identification code further comprises:

receiving said identification code from said second communication device; and

storing said identification code in a storage device within said first communication device.

11. (Previously Presented) The method of claim 10 further comprising using DTMF demodulation to demodulate said identification code prior to said storing said identification code in said storage device.
